PROFESSIONAL SUMMARY

Results-driven Software Engineer with 5+ years of experience designing and delivering scalable, high-performance web applications and cloud-based solutions. Proficient in Node.js, NestJS, TypeScript, React, and AWS, with deep expertise in backend architecture, RESTful API development, and workflow automation using Camunda BPMN. Led and mentored a team of 10 engineers, drove measurable improvements in system performance and reliability, and consistently delivered enterprise-grade solutions on time. Passionate about clean architecture, continuous improvement, and emerging technologies.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java

Frameworks & Libraries: Node.js, NestJS, Express.js, React, AWS Lambda, WebSockets, Loopback

Databases: MySQL, MongoDB, PostgreSQL, Redis, Firestore

Cloud & DevOps: AWS (EC2, S3, Lambda), GCP, Azure, Docker, Jenkins, NGINX, Firebase

Workflow & Tools: Camunda BPMN, VTiger CRM, Git, Vite, Figma, Adobe XD

Soft Skills: Team Leadership, Sprint Planning, Architectural Design, Risk Management, Mentoring

PROFESSIONAL EXPERIENCE

Senior Software Engineer

May 2022 –

Bridge Tech Labs — Colombo, Sri Lanka

- Led and mentored a cross-functional team of 10 engineers, conducting code reviews, sprint planning, and technical guidance to accelerate delivery cycles.
- Architected and built scalable backend microservices using Node.js, NestJS, TypeScript, and MongoDB, reducing average API response time by 35%.
- Designed and implemented Camunda BPMN workflow automation pipelines for enterprise lending operations, cutting manual processing time significantly.
- Managed and optimized AWS and VTiger cloud infrastructure, improving system uptime to 99.9% and reducing cloud infrastructure costs.
- Engineered secure RESTful APIs consumed by 500+ active users across web and mobile platforms.
- Maintained Linux server environments, enforcing security best practices and high-availability configurations for production systems.

Software Engineer

July 2019 – May 2021

Neominds Holdings (PVT) Ltd — Sri Lanka

- Developed full-stack web applications using Node.js, MongoDB, MySQL, and Redis, serving production workloads across multiple client projects.
- Built server-side logic and RESTful APIs for scalable, high-availability applications deployed on AWS, GCP, and Azure.
- Managed Linux cloud infrastructure, ensuring system uptime, security hardening, and performance optimization.
- Collaborated with cross-functional teams to deliver client projects on schedule, contributing to frontend integration using React and Bootstrap.

KEY PROJECTS

BridgeFund SME Lending Platform

Jun 2022 – Feb 2024

Dutch-based peer-to-peer business lending platform enabling SMEs to access fast, bank-independent credit. Investors fund loans and earn interest while SMEs secure capital for growth.

- Engineered core backend services handling loan origination, credit decisioning workflows, and investor fund management.
- Integrated Camunda BPMN to automate multi-stage lending workflows, reducing manual intervention in the approval pipeline.
- Deployed and maintained containerized services on AWS using Docker and Jenkins CI/CD.

Tech: *Node.js, TypeScript, NestJS, Camunda BPMN, VTiger, MySQL, MongoDB, Docker, Jenkins, AWS, NGINX*

Fitness Island — Coach & Workout Platform

Jul 2021 – May 2022

Mobile and web fitness application connecting users with personal coaches for customized workout programs and direct scheduling.

- Built RESTful API backend supporting coach onboarding, workout plan creation, and real-time user-coach communication.
- Implemented database schema and ORM layer using Sequelize and MySQL for efficient workout and user data management.

Tech: *Node.js, Sequelize, MySQL, Docker, Jenkins, Digital Ocean, NGINX, Certbot*

Fiji Wheelbarrow Race — Charity Mobile App

Jun 2020 – Jan 2021

Virtual team-based fundraising game where teams of 2–8 members compete across map stages to raise charity donations. Backend drives automated stage progression and donation tracking.

- Improved backend game logic using Node.js and Loopback, managing team state, stage transitions, and leaderboard rankings.
- Integrated AWS EC2/S3 for media hosting and automated deployments via Jenkins and PM2 process management.

Tech: *Node.js, Loopback, MySQL, AWS EC2/S3, Flask, PM2, NGINX, Jenkins*

EDUCATION

BSc (Hons) Computer Science and Software Engineering

Feb 2022 – Feb 2023

University of Bedfordshire — via Sri Lanka Institute of Information Technology

Graduate Diploma in Engineering

Feb 2018 – Feb 2020

Institute of Java and Software Engineering — Panadura, Sri Lanka
